

***“The HKD KLIK  
breaks the mold for  
snowmaking hydrants  
with its revolutionary KLIK  
hydrant technology.”***

## ***Add-Ons***

**KLik Manual  
Hydrant**

**KLik Auto  
Hydrant**

**Traditional  
Hydrants**

**Electrical  
Pedestals**

**Tower and  
Post Padding**

The HKD KLIK manual hydrant is a game changer for snowmakers. In a 12-hour snowmaking window, HKD KLIK manual hydrants can boost snowmaking production by as much as 90%, when compared to using traditional hydrants and hoses, with fixed HKD towers. This significant improvement is achieved by eliminating the time consuming step of hooking up, and unhooking, air and water hoses at each hydrant. The HKD KLIK hydrant is available in three lengths, 12”, 48” and 96” and is capable of operating on surface or buried pipe. The HKD KLIK hydrant can be automated.
